Planting Around Black Walnut Trees: Perennials

Black walnuts produce a chemical called juglone in their roots, leaves, fruits and woody tissues. Juglone can damage certain other plants growing nearby, causing stunting, wilting, and death. The radius of toxicity can extend up to 80 feet away from a single black walnut tree. If you have one of these trees in your yard, you may want to consider using juglone-resistant plants in your landscape.

JUGLONE-RESISTANT

Yarrow - *Achillea sp.*

Japanese Anemone - *Anemone hybrids*

Jack-in-the-Pulpit - *Arisaema triphyllum*

Aster - *Aster spp.*

Sedges - *Carex spp.*

Hay-Scented Fern - *Dennistaedtia punctilobula*

Blue Mist Flower - *Eupatorium coelestinum*

Joe-Pye Weed - *Eupatorium fistulosum*

Sweet Woodruff - *Galium odoratum*

Cranesbill - *Geranium spp.*

Avens - *Geum spp.*

Sneezeweed - *Helenium spp.*

Sunflowers - *Helianthus spp.*

Daylily - *Hemerocallis spp.*

Coral Bells - *Heuchera spp.*

Plantain Lily - *Hosta (some)*

Siberian Iris - *Iris sibirica*

Lilyturf - *Liriope spp.*

Blue Lobelia - *Lobelia siphilitica*

Peppermint - *Mentha piperita*

Bee Balm - *Monarda didyma*

Sundrops - *Oenothera spp.*

Sensitive Fern- *Onoclea sensibilis*

Cinnamon Fern - *Osmunda cinnamomea*

Spurge - *Pachysandra spp.*

Garden Phlox - *Phlox paniculata*

Jacob's Ladder - *Polemonium caeruleum*

Mayapple - *Podophyllum peltatum*

Christmas Fern - *Polystichum acrostichoides*

Black-Eyed Susan - *Rudbeckia hirta*

Stonecrop - *Sedum spp.*

Goldenrod - *Solidago spp.*

Spiderwort - *Tradescantia andersoniana*

Trillium - *Trillium spp.*

Violets - *Viola spp.*

JUGLONE-SENSITIVE

Columbine - *Aquilegia spp.*

Bugbane/Cohosh - *Cimicifuga spp.*

Lily - *Lilium spp.*

Peony - *Paeonia spp.*

Rhubarb - *Rheum rhabarum*

Chrysanthemum

False Indigo - *Baptisia australis*

Narcissus
