Nursery & Landscaping

## *Drought-Tolerant Herbaceous Plants*

If you have a spot that is hard to keep wet in summer, why fight nature? Use plants that thrive in dry conditions! The ecologically-friendly practice of planting drought-tolerant species that do not require irrigation (after the first year) is called *xeriscaping*. Using these plants helps to cut down summertime water use, saving you time, money and frustration.

### PERENNIALS

Most Herbs

Most Grasses

Yarrow - *Achillea* spp.

Hummingbird Mint - *Agastache* spp

Sandwort - *Arenaria montana*

Butterfly Flower - *Asclepias tuberosa*

Aster - *Aster novae-angliae*

Aubrieta - *Aubrieta deltoidea*

False Indigo - *Baptisia australis*

Tickseed - *Coreopsis* spp.

Coneflower - *Echinacea* spp.

Blanket Flower - *Gaillardia* hybrids

Cranesbill - *Geranium* spp.

Gaura - *Gaura lindheimeri*

Sneezeweed - *Helenium* spp.

Daylily - *Heemerocallis* hybrids

Siberian Iris - *Iris siberica*

Widow Flower - *Knautia macedonia*

Edelweiss - *Leontopodium alpinum*

Oriental Lily - *Lilium* hybrids

Sundrops - *Oenothera tetragona*

Russian Sage - *Perovskia atriplicifolia*

Creeping Phlox - *Phlox subulata*

Black-Eyed Susan - *Rudbeckia* spp

Meadow Sage - *Salvia sylvestris*

Pincushion Flower - *Scabiosa* spp.

Sedum, Upright - *Sedum* spp.

Speedwell - *Veronica spicata*

### ANNUALS

Ageratum

Alyssum

Celosia

Dusty Miller

Gazania

Geranium

Gomphrena

Lantana

Nierembergia

Petunia

Portulaca
